

## KS1 Calculation Policy

| Addition  |   |   |   |
|---|---|---|---|
| Learning objectives   | Concrete (using objects)  | Pictorial (drawing pictures)  | Abstract (mental methods)   |
| <b>Add 1-digit to a 2-digit number.</b><br>e.g. $24+5=$                   | Use base 10 to make and add the 10s and then the 1s together.<br>  | Draw the tens and ones. Then count and add.<br>  | Put the large number in your head and then count on using fingers.<br>25,26,27,28,29<br> |
| <b>Add two 2-digit numbers Without crossing the 10s.</b><br>e.g. $23+15=$ | Use base 10 to make the numbers and then count all the 10s and then 1s.<br>  | Draw base 10 and then count all the 10s and all the 1s.<br>  | <br>I know that $20+10=30$<br>and $3+5=8$<br>$30+8=38$                                   |
| <b>Add two 2-digit numbers Crossing the 10s.</b><br>e.g. $28+15=$         | Use base 10 to make the numbers.<br><br>Then add the 1s and exchange ten 1s for a 10 stick.<br>Then count 10s and 1s.<br> | Draw tens and ones.<br><br>Then add the 1s and exchange ten 1s for a 10 stick. Then count 10s and 1s.<br> | <br>I know that $8+5=13$<br>$30+13=43$   |

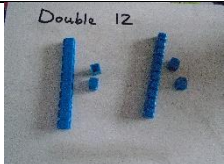

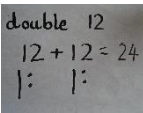

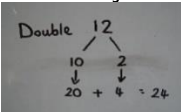

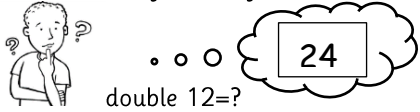

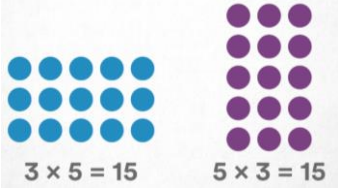

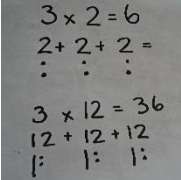

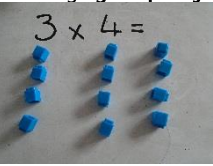

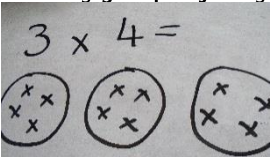

|   |   |   |  |
|---|---|---|--|
| <p><b>Adding three 1-digit numbers.</b></p> <p>e.g <math>3+3+5=</math></p> <p><math>6+4+2=</math></p>                                   | <p>Make the numbers, then count all to add together.</p>   | <p>Draw the 1s and the count...</p>  <p>Look for patterns<br/>- number bonds to 10      -doubles</p>   |  <p>Look for patterns.<br/>Then count on.<br/><math>3+3+5=</math><br/>I know double 3 is 6, count on 5=11</p> <p><math>6+4+2=</math><br/>I know that <math>6+4=10</math>, count on 2=12</p> |
| <p><b>Finding a missing number at the beginning.</b></p> <p>"Missing number at the beginning find the inverse and you are winning."</p> | <p>Write the inverse (opposite operation) number sentence. Calculate using cubes.</p>    | <p>Write the inverse (opposite operation) number sentence. Calculate by drawing tens and ones.</p>    | <p>Write the inverse (opposite operation) number sentence. Calculate by using known number bonds.</p> <p><math>\square + 6 = 16</math></p> <p><math>16 - 6 =</math></p> <p>I know that <math>16 - 6 = 10</math>.</p>   |
| <p><b>Finding a missing number in the middle.</b></p> <p>"Missing number in the middle find the difference to solve the middle."</p>    | <p>Build a tower of cubes for the first number and count on by adding cubes until you reach the larger number. How many extra cubes did you need?</p>  | <p>Draw a number line and put the smallest number at the beginning. Count on until you get to the larger number. How many jumps did you do?</p>    | <p>Put the first number in your head and count on using your fingers until you reach the larger number. How many fingers did you need?</p> <p>OR</p> <p>Use number bond knowledge.</p> <p>I know that 5 and 3 make 8.</p>  |

## Subtraction

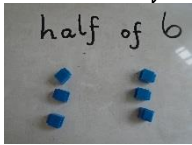

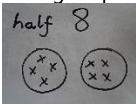

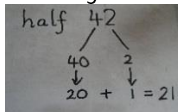

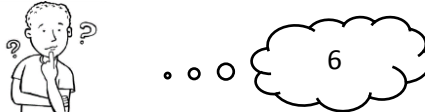

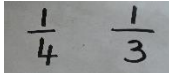

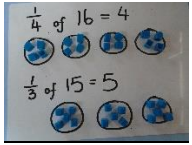

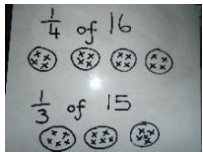

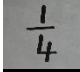

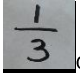

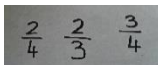

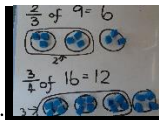

| Learning objectives  | Concrete (using objects)   | Pictorial (drawing pictures)   | Abstract (mental methods)  |
|--|--|--|--|
| <b>Subtract a 1-digit from a 2-digit number.</b><br><br>e.g. $17-5=$   | Use base 10 to make the number and take away the 1s.<br><br>  | Draw the tens and ones. Then cross out to take away.<br><br>  | <br>Counting back.<br>I put 17 in my head and count back 5.                               |
| <b>Subtract a 2-digit number from another 2-digit number. Without crossing the 10s.</b><br><br>e.g. $34-14=$ | First, use base 10 to make the big number. Then take away the 10s and 1s. Count the remainder.<br><br>  | Draw the 10s and 1s. Then cross out to take away and count the remainder.<br><br>   | <br>$36-14=?$<br>I know that $30-10=20$<br>I know that $6-4=2$<br>$20+2=22$               |
| <b>Subtract a 2-digit number from another 2-digit number. Crossing the 10s.</b><br><br>e.g. $36-18=$         | <div style="display: flex;"> <div style="flex: 1;">  </div> <div style="flex: 1; padding-left: 10px;"> <p>First, make the number using base 10.<br/>             You cannot take 8 away from 6, so you exchange 1 ten stick for 10 ones.</p> <p>Then you take away 8 1s and 1 10.<br/>             Count the 10s and 1s left over.</p> </div> </div> | <div style="display: flex;"> <div style="flex: 1;">  </div> <div style="flex: 1; padding-left: 10px;"> <p>First, draw the number using 10s and 1s.<br/>             You cannot take 8 away from 6, so you exchange 1 ten stick, for 10 ones.<br/>             Then you take away 8 ones and 1 ten stick by crossing out. Count the 10s and 1s left over.</p> </div> </div> | <br>$36-18=$<br>I know $36-10=26$ .<br>8 is made up of 6 and 2.<br>$26-6=20$<br>$20-2=18$ |

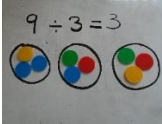

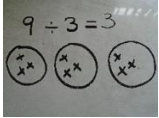

|  |   |   |  |
|--|---|---|--|
| <p><b>Find the difference</b></p>  | <p>The difference between 4 and 6<br/>Build a tower of 4 and a tower of 6.<br/>Put side by side, compare and count the difference.</p>                     | <p>Draw a number line. Start from the smallest number. Draw jumps, recording how many you have jumped each time.<br/>Remember Lazy frog likes to jump to the next 10. Then add your jumps together.</p>  | <p>Find the difference between 6 and 4.<br/>Start from the smallest number.<br/>I count on from 4 to 6, I have counted on 2 more.<br/>Find the difference between 21 and 35.<br/>I know from 21 to 30 will be 9 and then 30 to 35 is 5.<br/><math>9+5=14</math>.</p> |
| <p><b>Finding a missing number at the beginning.</b><br/>“Missing number at the beginning find the inverse and you are winning.”</p> | <p>Write the inverse (opposite operation) number sentence. Calculate using cubes.</p>    | <p>Write the inverse (opposite operation) number sentence. Calculate by drawing tens and ones.</p>   | <p>Write the inverse (opposite operation) number sentence. Calculate by using known number bonds.</p> <p>___ - 3 = 24</p> <p><math>24 + 3 = 27</math></p>  |
| <p><b>Finding a missing number in the middle.</b><br/>“Missing number in the middle find the difference to solve the riddle.”</p>    | <p>Build a tower of cubes for the smallest number and count on by adding cubes until you reach the larger number. How many extra cubes did you need?</p>  | <p>Draw a number line and put the smallest number at the beginning. Count on until you get to the larger number. How many jumps did you do?</p>    | <p>Put the smallest number in your head and count on using your fingers until you reach the larger number. How many fingers did you need?</p> <p>OR</p> <p>Use number bond knowledge.</p> <p>I know that 24 and 3 make 27.</p>                                       |

# Multiplication

| Learning objectives                  | Concrete (using objects)  | Pictorial (drawing pictures)  | Abstract (mental methods)   |
|--------------------------------------|---|---|---|
| <b>Doubles</b><br><br>e.g. Double 12 |  <p>Double 12</p> <p>Use base 10 or cubes to make the number. Then count the 10s and the 1s.<br/>10,20 1,2,3,4=24</p>  | <p>Draw the 10s and 1s.</p>  <p>Then add the 10s and then 1s.<br/>Or partition into 10s and 1s and double each number before adding back together.</p>  | <p>Instant recall of double facts.</p>  <p>double 12=?</p> <p>Or I know double 10 =20 and double 2=4<br/>And 20+4=24</p> |
| <b>Arrays</b>                        | <p>Using counters, cones and cubes make an <b>array</b> to show multiplication sentences.</p>  <p>5x3=15</p>  <p>2x3=6 or 3x2=6</p> | <p>Draw <b>arrays</b> in different rotations to find commutative multiplication sentences.</p>  <p>3 x 5 = 15      5 x 3 = 15</p>  | <p>Hold up fingers for the amount and touch them while counting in 2s, 5s or 10s.</p> <p>3x5=15<br/>5, 10, 15</p>        |
| <b>Repeated addition</b>             | <p>using objects, cubes and counters</p>  <p>2 + 2 + 2 = 6<br/>3x2=6</p>  <p>2 + 2 + 2 = 6<br/>3x2=6</p>                         | <p>Write out <b>addition sentence</b>, draw the 10s and 1s, then count up all the 10s and 1s.</p>   | <p>10x7=70<br/>10,20,30,40,50,60,70</p>    |
| <b>Groups of</b>                     | <p>Making <b>groups of</b> using counters or cubes.</p>  <p>3 x 4 =</p>  | <p>Drawing <b>groups of</b>.. 3 groups of 4</p>  <p>3 x 4 =</p>  | <p>2x8=16<br/>2,4,6,8,10,12,14,16</p>    |

## Division (including fractions)

| Learning objectives   | Concrete (using objects)  | Pictorial (drawing pictures)   | Abstract (mental methods)  |
|---|---|--|--|
| <b>Halving</b>  | Use base 10, counters or cubes to make the number.<br>Then share equally between 2.<br>            | Draw 2 circles and share out the 8 equally between the 2 circles. Count how many is in each group.<br><br>Or split the number into 10s and 1s, half the 10s number and then the 1s and put them back together.<br> | Instant recall double facts. Half of 12=?<br><br>Half of 42<br>I know that half of 40=20<br>I know that half of 2=1<br>And 20+1=21                                  |
| <b>Finding a quarter or third of a number.</b><br>   | Use base 10, counters or cubes to make the number. Then share equally between 4 or 3.<br>          | Draw 4 circles for quarters and 3 for thirds. Draw circles or crosses while counting and sharing out the number. Count the number in 1 circle.<br>  |  of 12<br>I know half of 12= 6, then half of 6 =3<br> of 9<br>I can count in 3s. |
| <b>Finding more than 1 quarter or 1 third.</b><br> | First, find 1 quarter or 1 third using objects. Then count the number of quarters or thirds.<br> | First, find 1 quarter or 1 third. Then count the number of quarters or thirds.<br>  | I know that 1 third is 3, so 2 thirds will be 3 + 3 = 6.<br><br>I know that 1 quarter is 4, so 3 quarters will be 4+4+4=12   |

|  |  |  |   |
|--|--|--|---|
| <p><b>Dividing</b></p> <p><b>sharing</b></p> | <p>Sharing objects equally into groups.<br/>9 counters shared into 3 groups.</p>  | <p>Draw the groups (circles) and then share out<br/>equally between the circles.<br/>9 shared into 3 groups.</p>  | <p>Count up on fingers counting in 2s, 5s<br/>or 10s until you reach the big number.<br/>Then count your fingers.<br/>15 ÷ 5 = 3<br/>5, 10, 15</p>  <p>you counted in 5s using 3<br/>fingers to get to 15.</p> |
|--|--|--|---|
